Touch. Hear. Cross.

TACTUS

Accessible Pedestrian Button

OVERVIEW 02

Safe crossing for everyone.

Pedestrian crossings are the most critical intersections in city life. Every citizen, every student, every parent deserves the right to cross safely.

TACTUS brings together Braille for the visually impaired, adaptive acoustics for the hearing impaired, and touch-sensitive use for everyone in a single button.

- Adaptive acoustics
- Braille maps
- Touch sensor

THREE SENSES, ONE BUTTON 03

One touch. Three senses.

A crossing experience anyone can understand through sight, sound, and touch.

01 TOUCH
Touch-sensor technology. A light tap is enough. Works with gloves.

02 HEAR
Adaptive acoustic alert. Self-adjusts to ambient noise. Voice guidance.

03 FEEL
Braille maps on both sides. Optional haptic feedback.

Compliant with **ISO 23600** and **Law No. 5378** on Persons with Disabilities.

FIELD DURABILITY 04

Every condition, every year.

Engineered for urban life its climate, its wear, its power.

Operating temperature Wide range, uninterrupted	–40°C / +70°C
Sealing & impact Resistant to dust, water, and impact	IP65 · IR3
Housing UV-stabilized polycarbonate, shatterproof	1.9 kg
Power draw 100–240 VAC wide-range input	< 5 W
Service life Programmable PC interface	> 5 yıl
Dimensions Fits standard poles	39 × 13 × 13 cm

5 YEARS WARRANTY	ISO 23600 SAFETY STANDARD
IR3 IMPACT RESISTANCE	IP65 INGRESS PROTECTION
CE CONFORMITY	EN 50293 EMC STANDARD

MADE IN TÜRKIYE
